

Belle Vue sonicGARDENS Smartphone recording project

I am looking to create a programmed fragment montage video of each garden recording.

Where: Audio recording in your garden, rooftop garden, balcony or backyard, apartment window.

What: An audio recording and 5 to 10 images of parts of the garden.

The cumulative sounds that can be heard from your garden.

Someone raking grass nearby, neighbours chatting (at a distance), electric sander further away, children playing and dog barking in the distance. Blackbirds, jackdaws, chattering and pottering about in the garden, the noise of pigeons flapping and cooing, bees drifting up and down the garden.

And the very occasional motor vehicle

(Easter Sunday 2020 Belle Vue Road- Shrewsbury, Shropshire)

It doesn't have to be quiet or peaceful, it is whatever is there when you record.

Length: Recordings should be 7 minutes in length (this will allow you to move away from the phone whilst recording and give me space to trim to 5 minutes)

How: For best results place phone on a towel or cushion with mic holes pointing up about 45 degrees

Email Submission process:

Once complete the 7 minute sound file can be shared directly from your recording app via email with the following information:

To: sonicgardens@junctionbox98.net

Subject: sonicGARDENS 2020

Body:

1 - Date and time

2 - General location (e.g. April 12 2020 Belle Vue Road- Shrewsbury, Shropshire)

3 – Add the photos to the email

Or

You can also submit files by whichever cloud transfer service you use (WeTransfer, Google Drive, DropBox etc.)
